INDEX

Aberdeen, Cryptogamic Show, 427, 447
Abney (Capt. R. E.), Photographic Operations in Transit of Venus, 449; Photographic Irradiation, 522
Acclimatisation Societies: Paris, 473, 514; Victoria, 380
Action of the Horse, 39
Aëronautical Experiments (*See* Balloons)
Aëronautical Society, 448
Africa: Lieut. Cameron's Expedition, 172, 214, 231; Expedition to investigate the Slave Trade, 195; Col. Gordon's Expedition to Gondokoro, 72, 29; Berlin Exploration Society, 134, 383, 512; Natural History Notes from South Africa, 486; Eclipse of 1874, 59
Agriculture: Baldwin's "Irish Farming," 203; "Sewage and Sewage Farming," 381; Technology of Agriculture, 307; Application of the Laws of Selection, 350; Utilisation of Sewage, 431; R. Jeffries on "Small Farms," 529
"Agriculture and Geology," by Amédée Burat, 458
Agricultural Schools, 15
Agricultural Society of Scotland, 151
Agricultural Shows: Science in the Showyard, 199
Airy (Hubert), Pollen-grains in the Air, 355, 398
Aitken (John), Photographic Irradiation, 105, 205, 222, 245, 381, 439, 522
Alga from Jersey (Br. A.), 433
Algeria: proposed Artificial Inland Sea, 231
Allman (Prof. G. J., F.R.S.), a New Order of Hydrozoa, 251
Amber in North America, 277
America: Association for the Advancement of Science; Meeting at Hartford, Connecticut, 194, 382, 441, 463; Exploration in Colorado and New Mexico, 308; Fisheries of New York, 214; Jasper's "Birds of North America," 212; Lobster Breeding, 214; Observatories: at West Point, 208; Annapolis, 209; Survey of Lakes, 35; Telegraphic Clocks, 308; National Academy of Science, 45; Weather Maps, 295, 460
American Journal of Science, 95
American Oyster Trade, 290
Ampelideæ, Indian (Br. A.), 433
Anagram, Scientific, by Huyghens, 480
Anatomy (*See* British Association, Sec. D)
Anderson (James S.), Aurora, 522
André (C. and G. Rayet), "Practical Astronomy," 42
Andrews (Dr., F.R.S.), High Pressures (Br. A.), 389; Phenomenon in Boring a Well (Br. A.), 432
Andrews (Prof. T., F.R.S.), De Boisbaudran on "Spectres Lumineux," 396
Anemometer for Wind on the Coast (Br. A.), 450
Angora Goat, 448
Angström (Prof. A. J.), Spectrum of Aurora Borealis, 210; Obituary Notice of, 376
"Animal Mechanism," by E. J. Marey, 498, 516
Animals: the Hypothesis that they are Automata, and its History, by Prof. Huxley, F.R.S. (Br. A.), 362, 438, 502, 520
Anstie (F. E., M.D., F.R.C.P.), Obituary Notice of, 398; Memorial to, 467
Ant-eater, Tongue of the (Br. A.), 413
Anthropological Institute, 19, 57, 98, 138, 177, 217
Anthropological Societies: Göttingen, 350; Paris, 276, 297, 513, 533
Anthropology: Aboriginal "Murri" Race of Australia, 521; Col. Lane Fox's Collection, 232; International Congress at Stockholm, 307, 332 (*See* British Association, Sec. D)
Antrim, County, Volcanic Phenomena of (Br. A.), 324
Antwerp, International Horticultural Exhibition, 471
A priori Physical Axioms (*See* Physical Axioms)
Aquarium Cars on Steam Ships, 530
Aquariums: Bridlington (proposed), 152; Crystal Palace, 428, 447; Herne Bay (proposed), 307; Manchester, 74, 93, 172, 275, 428; Southport, 384; Westminster, 230; Marine Aquarium for Inland Students, 260; Seaweed in, 530
Archæological Association, Meeting at Bristol, 231, 273
"Arctic Continent and Polar Sea," by Dr. J. Chavanne, 231
Arctic Exploration, 54, 213, 273, 294, 361, 383, 428, 439
Argentine Republic, Observatory at Cordoba, 72
Argyll (His Grace the Duke of), Flight of Birds, 147, 263
Armstrong (Henry E., Ph.D., F.C.S.), "Organic Chemistry," 333; Isomeric Cresols (Br. A.), 431
Artisans' Institute, 383
Assyria, Mr. Geo. Smith's Expedition, 134
Astronomical Society, 37, 158, 190
Astronomy: Bibliography of, 508; German Astronomical Society, 74
"Astronomy, Practical," by André and Rayet, 42
Astronomy (*See* British Association, Sec. A, and Observatories)
Atmospheric Currents in the West Indies, 65
Atoms and Molecules Spectroscopically Considered, by J. N. Lockyer, F.R.S., 69, 89
Atoms, Theory of, by M. Wurtz, 345
Aurora Borealis, 210, 355, 398, 460, 500, 522
Australia: Leichardt's Exploring Expedition, 15; Major Warburton's Expedition, 53; Sydney Museum, 81; Poisonous Snakes, 273; Angora Goats, 448; Aboriginal "Murri" Race, 521
Austrian Polar Expedition, 273, 383, 428, 439, 523
Automatism of Animals, 362, 438, 502, 520
Axioms, *à priori* (*See* Physical Axioms)

Babington (C. E., M.A., F.R.S.), "Manual of Botany," 242
Backhouse (T. W.), Curious Rainbow, 437
Baird (Spencer F.), "Annual Record of Science," 122; "Fisheries of New England," 201
Baker (Sir Samuel), Rede Lecture, 53
Balding (A.), Meteor at Wisbech, 483
Baldwin (Prof. Thos., M.R.I.A.), "Irish Farming," 203; "Sewage and Sewage Farming," 381
Balfour (Mr.), Development of Sharks (Br. A.), 413
Ball (R. LL.D., F.R.S.), Royal Astronomer of Ireland, 14
Balloon Ascents: from Odessa, 94; by M. de Fonvielle, 195; Fatal Experiment of M. de Groof, the "Flying Man," 230; Experiment at Woolwich, 230, 252, 285, 461; Ascents in New York and Canada, 344; Paris, 360
"Barbadoes, Rainfall of," by Governor Rawson, C.B., 241
Barker (Lady), "Lessons on Cooking," 283
Barrett (Prof. W. F.), Sounding and Sensitive Flames, 244
Barrows, Chambered, 290
Bastian (Dr. H. C.), his Experiments on Bacteria, 4
Bath, Natural History Club, 174
Beaumont (M. Elie de), Obituary Notices of, 447, 471
Becquerel (Edm.), Researches in Photography, 281
Bee-keepers' Association, 114, 383
Bees feeding on Larvæ, 31
Belfast: Meeting of the British Association (*See* British Association); Naturalists' Field Club, 361
Belgium, Royal Academy of Sciences, 15, 76, 235, 252
Bell (Lowthian, F.R.S.), Action of Carbonic Acid and Cyanogen on Oxide of Iron (Br. A.), 390
Belt (Thos., F.G.S.), The Glacial Period, 25, 62, 85, 105
Benger (F. Baden), Cry of the Frog, 483
Bennett (Alfred W., F.L.S.), Fertilisation of Labiatæ, 92; Specimens and Apparatus at the Br. A., 380; Pollen-grains in the Air (Br. A.), 398, 433
Bentham (G. F.R.S.), Systematic Botany (Br. A.), 433

Berlin: African Exploration Society, 134, 383; German Chemical Society, 198
Berwickshire Naturalists' Club, 330
Bethnal Green Museum, Col. Lane Fox's Anthropological Collection, 232
Bettany (G. T.), Biology at Cambridge, 53
Bezold (Prof. W. von), "The Science of Painting," 221
Bibliography of Science, 508
Binz (Prof.), Hay Fever, 26
Biology: at Cambridge, 53; Bibliography of, 508 (*See* British Association, Sec. D)
Birch (Dr. Samuel), International Congress of Orientalists, 419
Birds, Boddaert's Catalogue of, 123
Birds, Flight of, 147, 263, 518
Birds, Flowers destroyed by, 6, 24
"Birds in the British Museum," Catalogue by R. Bowdler Sharpe, 195, 378
Birds, Migration of, 415, 459, 520
"Birds of North America," by Dr. Theodore Jasper, 212
Birkbeck Literary and Scientific Institution, 252, 511
Birmingham: Proposed Aquarium, 93; Free Library, 93; Statue of Dr. Priestley, 213
Birmingham and Midland Institute, 407
Blackburn (Joseph), Supernumerary Rainbows, 503
Blood, Transfusion of, 173
Boddaert's Catalogue of Birds, 123
Boisbaudran (Lecoq de), "Spectres Lumineux," 396
Bonney (Rev. T. G.), The Glacial Period, 44, 62, 85, 105
Borrelly's Comet, 267, 287, 336
Boston (U.S.), Society of Natural History, 78, 118, 277
Botanical Congress at Florence, 74
Botanico-Geological Excursion into the Grampians, 90
Botany: "Natural Orders of the Vege able Kingdom," by Prof. Oliver, F.R.S., 222; "Manual of British Botany," by C. C. Babington, M.A., F.R.S., 242; Respiration and Nutrition in Plants, 427; Systematic Botany (Br. A.), 433; "Flora of Dorsetshire;" "Flora of Settle in Craven," 459; Bibliography of Botany, 510 (*See* British Association, Sec. D)
Boulder Committee of Br. A., Report, 388
Boulger (G. S.), Colour in Flowers not due to Insects, 520
Braham (Philip, F.C.S.), Experiments on Light (Br. A.), 389
Braham and Gatehouse (Messrs.), Dissociation of Nitric Acid (Br. A.), 452
Brain (The), Localisation of its Functions, by Dr. Brown-Séquard, 45, 245, 250
Brain (The) and Auditory Capsule (Br. A.), 412
Breslau: Population and Health, 154, 236; Scientific Congress, 416
Bridlington: Proposed Aquarium, 152; "Crag" Beds (Br. A.), 412
Bristol College of Science and Literature, 93, 134
BRITISH ASSOCIATION: Meeting at Belfast—Preliminary Arrangements, 193, 230, 293; Officers of Sections, 194, 230; Room for Specimens and Apparatus, 263, 380; Inaugural Address by Prof. Tyndall, D.C.L., F.R.S., President, 309; Financial Statement, 336; Recommendations of the Committee, Grants, 361. Reports—Rainfall (1873-74), 342; Dredging, Coast of Durham and North Yorkshire, 343; Mathematical Tables, 372; Nomenclature of Dynamical and Electrical Units, 372; Siemens' Pyrometer, 372; Tables of Wave Numbers, 373; Sub-Wealden Exploration, 273; Influence of Forests on Rain, 373; Thermal Conductivities of Rocks, 386; Progress of Chemistry, 387; Exploration of Victoria Cave, Settle, 387; Boulder Committee, 388; Close Time Committee, 388; Teaching of Physics in Schools, 410; Luminous Meteors, 430; Isomeric Cresols, 431; Utilisation of Sewage, 431; Classification of Labyrinthodonta, 449
Section A (*Mathematical and Physical Science*).—Officers, 194; Opening Address by the Rev. Prof. J. H. Jellett, M.A., M.R.I.A, 319; Grants, 361; Perturbations of the Compass by the Rolling of the Ship, by Sir Wm. Thomson, 388; Spectrum of Coggia's Comet, by Dr. Huggins; Experiments on Light, by P. Braham, F.C.S., 389; Kirchhoff's Rules for Electric Circuits, by Prof. Clerk-Maxwell, F.R.S.; Sun-spot and Atmospheric Ozone, by T. Moffatt, M.D.; Charts on Gnomonic Projection, by J. G. Morrison, 411; Construction of a perfectly Achromatic Telescope, by Prof. G. G. Stokes; Periodicity of Cyclones, Rainfall, and Sun-spots, by C. Meldrum, 431; Photographic Operations in Transit of Venus, by Capt. Abney, R.E., 449; Anemometer for Wind on the Coast, by Dr. De la Rue, F.R.S., 450; Kinetic Energy, by J. Purser, M.R.I.A., 450; Nicol's Prisms, by W. Ladd, 451
Section B (*Chemical Science*).—Officers, 194; Opening Address by Prof. A. Crum Brown, M.D., F.R.S.E., F.C.S., 337; Grants, 361; Chemical Composition of Jute Fibre, by Prof. Hodges; High Pressures, by Dr. Andrews, F.R.S.; Latent Heat of Liquefied Gases, by J. Dewar, F.R.S.E.; Spontaneous Generation, by Dr. Debus, F.R.S.; Phosphoric Acid, by Mr. Ogilvie, 389; Improved Filter Pump, by W. Jesse Lovett; Sulphur-Urea, by Prof. Emerson Reynolds; Action of Carbonic Acid and Cyanogen on Oxide of Iron, by Lowthian Bell, F.R.S.; Electrotypic Experiments on Metallic Chlorides, by Dr. Gladstone, F.R.S., and Mr. Tribe; Composition of certain kinds of Food, by W. J. Cooper, 390; Opium Derivations, by Dr. Wright; Phenomenon in Boring a Well, by Dr. Andrews; Reaction of Hydrogen, Peroxide, &c., by Mr. Fairley; General Equations of Chemical Decompositon, by Prof. Clifford, F.R.S.; Cyanogen in Commercial Bromine, by Dr. T. L. Phipson; Sesqui-Sulphide of Iron, by Dr. Phipson; Chlor.-Bromides and Brom Iodides of the Olefines, by Prof. Maxwell Simpson. F.R.S., 432; Specific Volumes of Liquids, by Prof. Thorpe; Dissociation of Nitric Acid, by Messrs. Braham and Gatehouse; Process of Fossilisation, by Dr. Carpenter, F.R.S.; Abnormal Chlorides, by Prof. Roscoe, F.R.S., 452
Section C (*Geology*).—Officers, 194; Opening Address by Prof. Edw. Hull, F.R.S., 324; Grants, 361; Silicified Wood from the Rocky Mountains, 390; Microzoa in Chalk Flints, by Jos. Wright; Polyzoa from Silurian Rocks, by Prof. H. A. Nicholson; "Crag" Bed of Bridlington, by J. Gwyn Jeffreys, F.R.S., 412; Tyrone Coal-field, by Mr. Hardman, 432
Section D (*Biology*).—Officers, 194; Opening Address by Prof. Peter Redfern, M.D., 327; Grants, 361
Department of Anatomy and Physiology.—Brain and Auditory Capsule, by Prof. Cleland, 412; The Iguanodon, by B. Waterhouse Hawkins; Development of Sharks, by Mr. Balfour; Tongue of the Ant-eater, by Prof. Macalister; *Columella auris* in Amphibia, by Prof. Huxley; the Eye of Cephalopoda, by E. Ray Lankester; Effects of Ozone, by Prof. Redfern, 413; Wild Flowers and Insects, by Sir J. Lubbock, Bart., F.R.S., 402, 422.
Department of Zoology and Botany.—British Mollusca, by J. Gwyn Jeffreys, F.R.S.; Distribution of Cassowaries, by P. L. Sclater; Potato Disease, by J. Torbitt; *Eozoön canadense*, by Dr. Carpenter, 390; Alga from Jersey, by Dr. Williams; Indian Ampelideæ, by Prof. Lawson; Tree-ferns, by D. Moore; Mosses of the North of Ireland, by S. A. Stewart; Abnormal Daisy, by Prof. Dickson; Systematic Botany, by G. Bentham, F.R.S.; Pollen-grains, by A. W. Bennett, 433; External Shell of Mollusca, by E. R. Lankester, 452; English Nomenclature in Biology, by E. R. Lankester, 453
Section E (*Geography*).—Officers, 194; Opening Address by Major Wilson, R. E., 339; Grant to Palestine Exploration Fund, 361
Section F (*Statistics and Economic Science*).—Officers, 194; Grant, 361
Section G (*Mechanical Science*).—Officers, 194; Grant for Measuring Speed of Ships, 361; Opening Address by Prof. James Thompson, LL.D., 390
British Museum: Zoological Curatorship, 273; Sharpe's "Catalogue of Birds," 195, 378
Bromide Plates for Photography, 281
Bromine, Commercial, Cyanogen in (Br. A.), 432
Brown (Prof. A. Crum), Opening Address in Sec. B, Br. A., 337
Brown (Robert), and Sprengel, on the Structure of Plants, 161
Brown-Séquard (Dr.), Functions of the Brain, 45
Bruce-Clarke (W.), Palæotherium magnum, 124
Brussels, Royal Academy of Sciences, 407, 434
Burat (Amédée), "Geology and Agriculture," 458
Burnham (S. W.), Lakes with Two Outfalls, 124
Burnley Grammar School, 134
"Butterflies of North America," by W. H. Edwards, 231

Cable-laying, Appliances on board the *Faraday*, 64
Caen Academy of Science, 213

California : Marine Aquarium, 94 ; Observatory and School of Mechanical Arts, 171
Canary Islands, Fauna of the, 276
Cambridge : Natural Science Club, 16 ; Science at, 34, 53, 93, 114, 132, 133, 151, 194, 213, 286, 472, 488 ; New Physical Laboratory, *With Plans*, 139 ; Strickland Curatorship, 250
Cameron (Lieut.), Livingstone Expedition, 172, 214, 231
Camphor, 8, 16
Canada, Geological Survey, 144
Cape of Good Hope, Catalogue of Stars, 295
Capron (J. Rand), Hay Fever, 63 ; Aurora Borealis, 460
Carbonic Acid and Cyanogen, their action on Oxide of Iron (Br. A.), 390
Cardiff Naturalists' Society, 472
Carnivorous Habits of Plants, by Dr. Hooker, C.B., President R.S. (Br. A.), 366, 406, 428, 438, 463
Carp, Longevity of, 147, 165
Carpenter (W. B., M.D., F.R.S), "Principles of Mental Physiology," 40 ; Ocean Currents, 52, 62, 83, 113 ; Researches on *Eozoön canadense* (Br. A.), 103, 390 ; Lenz's Doctrine of Ocean Circulation, 170 ; Process of Fossilisation (Br. A.), 452 ; Lectures on Geology, 511
Cassowaries, Distribution of (Br. A.), 390
Cause and Effect, Quantitative Relations of, 43, 84, 103
Cavendish Laboratory, Cambridge, erected by the Duke of Devonshire, 139
Cedar-wood, Natural History collections damaged by, 35
Cephalopoda, The Eye of (Br. A.), 413
Challenger, H.M.S., progress of, 34, 54, 73, 359, 360, 427, 511 ; Report from Prof. W. Thomson, 142 ; Botany of the Expedition, by H. N. Moseley, 165 ; Deep-sea Temperatures, 254
Charts on Gnomonic Projection (Br. A.), 411
Channel Tunnel to France, proposed, 181
Chemical Decomposition, General Equations of (Br. A.), 432
Chemical Society, 35, 37, 77, 117, 153, 157, 215, 275, 532
Chemical Society's Journal, 115, 472
Chemistry : Bibliography of, 508 ; Memoir of Joseph Priestley, 239 ; Monthly Reports of Progress (Br. A.), 387 ; "Organic Chemistry," by H. E. Armstrong, Ph.D., F.C.S., 333 (*See* British Association, Sec. B)
Children of Different Races, their Mental Potentiality, 272
China : Camphor Trade, 16 ; Mammals of Moupin, 32
Chisholm (H. W.), International Metric Commission, 130
Chlorides, Abnormal (Br. A.), 452
Chronometers, Uncompensated, 63
Chrysomela Banksii, 355, 419
Cinchona Cultivation in St. Helena, 471
Cincinnati Observatory, 186, 188
Civil Engineers' Institution, 54, 214, 447
Clarke (Hyde), Degeneracy of Man, 163
Cleland (Prof.), Brain and Auditory Capsule (Br. A.), 412
Clerk-Maxwell (Prof. J., F.R.S.), Plateau on Soap-Bubbles, 119 ; Molecular Motion, 123 ; Grove's "Correlation of Physical Forces," 302 ; Kirchhoff's Rules for Electric Circuits (Br. A.), 411 ; Van der Waals on the "Continuity of the Gaseous and Liquid States," 477 ; Double Rainbow, 437
Clifford (Prof., F.R.S.), General Equations of Chemical Decomposition (Br. A.), 432
Clocks, Telegraphic, in America, 308
Clockwork, Regular Motion in, 459
Close Time Committee (Br. A.), Report, 388
Clothworkers' Company, Professorship of Textile Industries, 213
Clowes (Frank), Glass Cells with Parallel Sides, 44
Coal : in Japan, 232 ; Central India, 308 ; Spitzbergen, 472
Cochrane (Capt. J. D., R.N.), Lakes with Two Outfalls, 124
Cockroach, Salivary Glands of the, 381, 439
Coffee Blight, 177
Coggia's Comet, 56, 113, 132, 149, 179, 184, 191, 212, 226, 252, 273, 287, 294, 336, 389, 534
College for Men and Women, 472
College for Working Women, 488
Collier (Jas.), Quantitative Relations of Cause and Effect, 43 ; Physical Axioms, 61, 84, 104
Colliery Explosions and the Weather, 157, 224
Colonial Geological Surveys :—I. Canada, 144 ; II. Victoria, 200
"Colorado, Flora of," 344
Colour in Flowers not due to Insects, 503, 520
Columella auris in Amphibia (Br. A.), 413
Comber (Thos.), Colour in Flowers not due to Insects, 520
Comets : Borrelly's, 252, 267, 287, 336 ; Coggia's, 56, 113, 132, 149, 179, 184, 191, 212, 226, 252, 273, 287, 294, 389, 534
"Comets and the New Comet of 1874," 397
Comets, The Forms of, by M. Faye, 227, 245, 268, 287
Compass, Perturbations of the, by Ship's Rolling (Br. A.), 388
Competitive Examinations, 416
Connecticut Academy of Arts and Sciences, 273
"Continuity of the Gaseous and Liquid States," by J. D. Van der Waals, 477
Contjean (Ch.), "Eléments de Géologie," 100
"Cooking, Lessons on," by Lady Barker, 283
